SUMMARY

Full Stack Engineer with 1 year of hands-on experience building production-grade MERN stack applications. Developed a multi-vendor eCommerce platform featuring real-time WebSocket notifications, Stripe payment integration, and role-based access control. Proficient in React/Redux frontends, RESTful API design, JWT authentication, and Agile workflows, with a track record of delivering complete, end-to-end features independently.

EXPERIENCE

Freelance MERN Stack Developer

Feb '26 — Apr '26

Self-Employed

- Developed and delivered custom full-stack web applications for clients using the MERN stack, managing projects end-to-end.
- Built RESTful APIs and responsive React frontends tailored to client requirements, ensuring cross-browser compatibility.

MERN Stack Developer

Aug '25 — Dec '25

InfinitySoftSolutionz

- Built scalable full-stack applications using the MERN stack, delivering features across buyer, seller, and admin roles.
- Designed RESTful APIs with Node.js/Express.js and implemented JWT -based authentication with role-based authorization.
- Integrated Stripe payment gateway and Cloudinary media storage for complete transaction and media management.

Frontend Developer Intern

Mar '22 — May '22

B-Source

- Built responsive, reusable UI components using React.js and Tailwind CSS, improving cross-device compatibility.
- Integrated backend APIs to render dynamic content and optimized layouts for performance and cross-browser consistency.

PROJECTS

Shopora – Multi-Vendor eCommerce Platform

- Built full-stack multi-vendor platform supporting buyers, sellers, and admins with complete role-based access control.
- Integrated Stripe for end-to-end payment processing and real-time order notifications via WebSockets.
- Developed interactive seller dashboards for product management, order tracking, and revenue insights.
- Tech Stack: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Tailwind CSS, Stripe, WebSockets

Aurr.us – Quick Commerce Grocery Platform

- Implemented dynamic product listings, category filtering, and cart functionality with fully responsive UI components.
- Integrated REST APIs for real-time product, user, and order data with global state managed via Redux Toolkit.
- Containerized the application using Docker for consistent deployment across environments.
- Tech Stack: React.js, Tailwind CSS, Redux Toolkit, Node.js, Express.js, Firebase, Cloudinary, Docker

SKILLS

Languages JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend React.js, Next.js, Redux Toolkit, Context API, Tailwind CSS, Responsive Design

Backend Node.js, Express.js, RESTful APIs, JWT Authentication, Google OAuth, WebSockets, Microservices

Databases MongoDB, Mongoose, Firebase

Cloud & DevOps Vercel, Netlify, Firebase Hosting, Cloudinary, Docker, AWS

Tools Git, GitHub, Postman, Stripe Integration, MVC Architecture, Agile

EDUCATION

BS in Software Engineering, Virtual University of Pakistan

'20 — '24
